

Sensitive Port Scanner

```
#TestKills Port scanner import socket
import socket

ip = socket.gethostbyname(socket.gethostname()) #your IP address

for port in range(65535): #all port are in 0-65535
    try:
        serv = socket.socket(socket.AF_INET, socket.SOCK_STREAM)
        serv.bind((ip,port))

    except:
        print('[OPEN] Port Open :',port)
        serv.close()
```
